Introductionxv

Chapter 1: JavaScript Prerequisites..... 1

 Introduction to JavaScript..... 1

 Setting Up the Environment 2

 Constants and Variable Declaration 6

 Rest Parameter 8

 Destructuring and Spread Syntax 10

 Control Loops 12

 for 12

 forEach 13

 while 14

 do...while 14

 Type Conversion 15

 Operators 16

 Arithmetic Operators 16

 Comparison Operators..... 17

 Assignment Operators 17

 Logical Operators 17

 Ternary Operator..... 17

 Functions 20

 Closures 21

 Arrays..... 22

TABLE OF CONTENTS

- Classes and Modules 26
- Creating a Local Server..... 30
- DOM Modification..... 31
- Error Handling 33
- HTTP Requests 35
- Promises 37
- Summary..... 39
- Chapter 2: Introducing React.js 41**
 - Setting Up the Environment 41
 - Installing Node.js 41
 - Installing React..... 42
 - Basic Concepts of React 45
 - Single-Page Applications..... 46
 - Immutability..... 47
 - Purity 48
 - Composition..... 48
 - Creating Your First React Component 50
 - Creating Elements Using JavaScript 51
 - Creating Elements Using JSX 53
 - Function vs. Class Component 54
 - Passing Props..... 56
 - Stateless and Stateful React Components..... 57
 - Working with the State Object 58
 - React Lifecycle..... 61
 - Mounting 61
 - Updating 63
 - Unmounting 64
 - Hooks 64
 - State Hook 65
 - Effect Hook 66
 - Custom Hooks 69

Working with Data.....	74
AJAX Calls	77
Styling React Components	80
CSS in React.....	81
SASS and SCSS in React	83
Babel and Webpack	85
Summary.....	89
Chapter 3: Next.js	93
Introduction to Next.js.....	93
Features of Next.js	94
Getting Started	94
Routing in Next.js.....	98
Dynamic Pages	101
Adding Multimedia Content Using CSS	104
Getting Data from Remote Server	109
Creating Interactive App Using Next.js.....	113
Using Redux with Next.js	117
Store	119
Actions.....	120
Reducers	120
Using GraphQL with Next.js	131
Summary.....	136
Chapter 4: Adding Server-Side Rendering to Your React Application.....	139
Importance of Server-Side Rendering.....	139
Building a Simple React App.....	141
Creating Functional React Component.....	141
Passing Props to Functional React Component	142
Converting Functional Component to Class Component.....	143
Using Next.js for Server-Side Rendering.....	146

TABLE OF CONTENTS

Adding CSS to Next.js 147

Integrating Bootstrap to Your App 149

Summary..... 151

Chapter 5: Unit Testing Using Jest..... 153

Setting Up Jest..... 154

Writing Your First Test Using Jest..... 155

Matchers 158

 Common Matchers 158

 Truth Matchers 159

 Comparison Matchers 161

 String Matcher..... 162

 Matcher for Iterables 163

 Exception Matcher..... 164

Testing a React Component Using Jest and Enzyme 166

Summary..... 173

Chapter 6: Deploying Your App to a Server 175

Deployment Process 175

Setting Up Environment Variables..... 176

Introduction to Docker 181

Creating a Docker Container for Your App..... 183

Hosting the Container 186

Summary..... 188

About the Author

Mohit Thakkar is a software engineer with a multinational company. He has a bachelor's degree in computer engineering and is the author of several independently published titles, including *Artificial Intelligence*, *Beginning Machine Learning in iOS*, *Data Mining & Business Intelligence*, *iOS Programming*, and *Mobile Computing & Wireless Communication*. He has also published a research paper titled "Remote Health Monitoring using Implantable Probes to Prevent Untimely Death of Animals" in the *International Journal of Advanced Research in Management, Architecture, Technology and Engineering*.

About the Technical Reviewer

Alexander Chinedu Nnakwue has a background in mechanical engineering from the University of Ibadan, Nigeria, and has been a front-end developer for over three years working on both web and mobile technologies. He also has experience as a technical author, writer, and reviewer. He enjoys programming for the Web, and occasionally, you can also find him playing soccer. He was born in Benin City and is currently based in Lagos, Nigeria.

Acknowledgments

The completion of this book could not have been possible without the contribution of numerous people whose names may not all be cited. Their contributions are sincerely appreciated and acknowledged. However, I would like to take this opportunity to express my gratitude particularly to the following:

Louise Corrigan, Senior Editor at Apress, and **James Markham**, Development Editor at Apress, who saw potential in the idea behind the book. They helped kick-start the book with their intuitive suggestions and made sure that the content quality of the book remains uncompromised.

Alexander Nnakwue, Technical Reviewer of the book, who made sure that the practical aspects of the book are up to the mark. His insightful comments have been of great help in the refinement of the book.

Nancy Chen, Coordinating Editor at Apress, who made sure that the process from penning to publishing the book remains smooth and hassle-free.

Family, friends, and mentors, who have always been supportive of my aspirations and have guided me throughout my journey.

You, who wish to refine your skills by reading this book so that you can make a difference in the lives of those around you. You encourage me to contribute toward collaborative education.

Thank you!

Introduction

With the popularity of frameworks such as Node, React, and Angular, web developers tend to render everything on the client-side, but there are several disadvantages to this approach. To protect sensitive information and optimize response times, developers might want to add server-side rendering to their applications. This book demonstrates how a React application can be rendered on the server-side using frameworks such as Next and Redux.

The book starts with the basic introduction to JavaScript, followed by the introduction to React. Once the reader is aware of both these concepts, the Next framework is introduced. The reader will then learn how to integrate Next to a React application in order to render content on the server-side. The reader will also learn about state management using Redux, unit testing using Jest, and deployment using Docker. At the end of this book, the reader will have all the knowledge necessary to build and deploy a fully server-side rendered application with scripts for unit testing.

To learn more, start reading right away.
