About the Author

Keerti Kotaru has been associated with various software development projects from 2002. He has acquired knowledge and expertise designing and developing web and mobile applications. In recent times he has used AngularJS and related JavaScript technologies extensively.

He has a Masters in Software Systems degree from the University of St. Thomas, Minneapolis/St. Paul, Minnesota, USA.

Keerti Kotaru is awarded Microsoft Most Valuable Professional (MVP) in 2016. He is a regular speaker and organizer for an AngularJS Hyderabad Meetup group (meetup.com/ngHyderabad). He is involved in technology activities and events for Google Developer

Groups (GDG) Hyderabad. He presented multiple sessions for this group, including the annual events DevFest 2014 and DevFest 2015.

He has also presented sessions for TechGig, AngularJS Pune, and AngularJS Chicago Meetup groups.

He blogs at <http://bit.ly/kotaru>. Learn more about him at <http://bit.ly/keertikotaru>.

About the Technical Reviewer

Sathish VJ is a technologist who is passionate about science and all sorts of technologies. Among other things as a full-stack engineer, he has previously been a front-end architect developing solutions using AngularJS and Angular Material. In the area of Angular, he is currently working on Angular2 and Ionic2 alongside related technologies.

Acknowledgments

My ongoing journey with software development has been overwhelming and yet thoroughly enjoyable. Along the way, I have been trained and mentored by individuals, institutions, organizations, and last but not least, software developer communities.

ngHyderabad and GDG Hyderabad (Google Developer Groups) are two developer communities in my city that have had an enormously positive influence on me. The communities include engaging discussions, sharing of ideas, and proactive volunteering efforts from each member. They created an opportunity for showcasing my knowledge. This book is a direct result of my interactions and learning with the communities.

I thank CDK Global for providing initial direction, space, and the opportunity for learning the latest programming languages and tools.
